PLANNING INSTALLATION

Make sure that all the parts are in the boxes before starting the assembly.

Follow all assembly instructions to assure proper construction.

You must schedule enough time to complete the assembly. You cannot leave the unit unattended if it is not fully assembled, even if it is already anchored to the ground.

In order to avoid damage to the shelter and its components, place all parts on a soft surface and use appropriate tools.

During assembly, do not use the structure as a support. Use a stepladder.

Keep this User Guide and Parts List for future reference.
